

# Habitat & Water Resource Assessment for Land Use Planning

## *2-day Short Course*

### Offered by Hudsonia Ltd. and the Hudson River Estuary Program

This two-day intensive course is designed to teach municipal officials, planners, and land trust staff about land use approaches and opportunities to proactively conserve important natural areas. The course will cover methods to recognize significant habitat and water resources, gather information to assess a site and review site plans, and achieve more ecologically-sound planning outcomes. Through indoor lectures and an outdoor session, participants will learn how to interpret aerial photos and maps to predict the locations of important habitat and water features, consider site context, conduct a field visit, and apply conservation principles in reviews of land development proposals. Hands-on exercises in site assessment and environmental review will cover many issues and scenarios relevant to the work of town agencies and conservation organizations.

The course will be taught by Hudsonia and Estuary Program staff, and participants will receive the *Biodiversity Assessment Manual for the Hudson River Estuary Corridor* and companion *Guidebook for Biodiversity Assessment; Creating a Natural Resources Inventory: A Guide for Communities in the Hudson River Estuary Watershed*; other course materials; and lunch and other refreshments each day. Participants must attend both days.

**When?** September 14-15, 2018 (approximately 9am-5pm each day)

**Where?** NYS Department of Environmental Conservation office  
21 South Putt Corners Rd, New Paltz, NY

**Who should attend?** Land use decision-makers in the ten counties that border the Hudson River Estuary are encouraged to participate. Space is limited, and preference will be given to members of town boards, planning boards, conservation commissions, and watershed councils; staffs of land trusts; and other municipal or NGO representatives directly involved in environmental reviews, land use policy-making, and planning.

**Registration:** Please submit the application form on the reverse (or use Survey Monkey) to be considered for enrollment in the course. Space is limited; you will be notified if accepted.
